TABLE OF CONTENTS

MOLECULAR BIOLOGY
Volume 1, Numbers 1-6, 1967
(A translation of Molekulyarnaya Biologiya)

CONTENTS

Volume 1, Number 1 January-February, 1967

	Engl.	Russ.
In Vitro Biosynthesis of Antibodies in Recipient Spleen Cells of Unimmunized Animals Induced by Fractions of Homologous RNA of Immunized Donors – B. D. Stanchev	1	3
Self-Assembly of Ribosome-Like Particles in Vitro from "Chloromycetin" Particles and a Certain Fraction of Ribosomal Protein – M. I. Lerman, R. A. Zimmermann, L. P. Gavrilova, and A. S. Spirin	9	12
Kinetic Method of Calculating the Association Constants of Protein Molecules – B. I. Kurganov	14	17
Circular Dichroism and Optical Rotatory Dispersion of Muscle Phosphorylase B – Yu. M. Torchinskii, N. B. Livanova, and V. Ya. Pikhelgas	23	28
Study of the Effect of Light and Heavy γ-Globulin Chains on the In Vitro Synthesis of Antibodies and Nonspecific γ-Globulins – A. E. Gurvich and V. T. Skvortsov	29	35
Isolation and Purification of Lysozyme by Fractionation on a Chitin Column – I. A. Cherkasov, N. A. Kravchenko, and E. D. Kaverzneva	34	41
Photooxidation of Lysozyme in Presence of Methylene Blue and Isolation of Modified Products – N. A. Kravchenko, N. B. Stepanova, V. Kh. Lapuk, and I. A. Cherkasov	39	47
Examination of Transient-State Enzyme Reactions by the Graph Theory Method – M. V. Vol'kenshtein, B. N. Gol'dshtein, and V. E. Stefanov	43	52
Reversible Photooxidation of Bacterioviridin with the Formation of an Electrode-Active Oxidized Form – V. B. Evstigneev, V. A. Gavrilova, and G. D. Olovyanishnikova	49	59
Inhibitory Effect of Borates on the Three-Stage Reaction of Hydrolysis by α-Chymotrypsin of Unspecific Substrates – I. V. Berezin, G. Ya. Kolomiitseva, A. V. Levashov, and K. Martinek	56	67
Sedimentation Method of Investigating Binding of DNA to Low-Molecular Substances and to Some Proteins – Yu. N. Kosaganov and Yu. S. Lazurkin	64	75
Synthesis of RNA in Enucleated Oocytes of the Frog Rana temporaria – Zh. G. Shmerling	70	83
Influence of DNA Synthesis on the Regulation of Messenger RNA Formation of E. coli B Cells Infected with T-Even Phages – Yu. N. Zograf, V. G. Nikiforov, and M. F. Shemyakin	79	94
Escherichia coli Mutant K12 with Impaired Systems of Glucose Utilization – V. N. Gershanovich, G. I. Burd, N. V. Yurovitskaya, A. G. Skavronskaya, V. V. Klyucheva, and V. P. Shabolenko	88	104
Functional Heterogeneity of Mitochondria from Normal and Tumor Cells – N. K. Monakhov	97	114
Participation of Anticodons in the Acceptor Function of Transfer RNA – L. L. Kiselev, L. Yu. Frolova, and N. M. Aleksandrova	105	123
Nuclear Ribonucleoproteins Containing Messenger RNA (Isolation and Properties) – O. P. Samarina, A. A. Krichevskaya, Yanosh Molnar, V. I. Bruskov, and G. P. Georgiev	110	129
Distribution of DNA Components of Bean Leaves among Cellular Fractions – T. G. Beridze, M. S. Odintsova, and N. M. Sisakyan	122	142
Effect of Light on the Pheophytinization of Chlorophyll and Its Analogs – E. V. Pakshina, M. I. Bystrova, and A. A. Krasnovskii	134	154

Formaldehyde-Induced Uncoiling of DNA — É. N. Trifonov, Yu. S. Lazurkin, and M. D. Frank-Kamenetskii 142 164

Volume 1, Number 2 March-April, 1967

The Inhibitory Effect of ATP in Aminoacyl-RNA-Synthetase Reaction — V. A. Korzhov 153 179
Thin-Layer Microchromatography of Dinitrophenyl and Phenylthiohydantoin Derivatives of Amino Acids — B. G. Belen'kii, É. S. Gankina, S. A. Pryanishnikova, and D. P. Érastov 158 184
Mechanism of RNA-Polymerase Reaction: Formation of Complexes of Enzymes and Insoluble Templates — Yu. V. Kozlov and G. P. Georgiev 162 190
The Effect of Some Enzymes on Nucleotide Substrates Adsorbed on Triethylaminoethyl-Cellulose — S. K. Vasilenko and N. M. Teplova 168 197
The Conformation of β-Lipoproteins of Human Blood — G. V. Kobozev and G. V. Troitskii 173 202
Glyoxal Modification of tRNA — N. E. Broude, É. I. Budovskii, and N. K. Kochetkov 183 214
Chemical Nature of Cryomacroglobulin — L. N. Kaigorodova and E. D. Kaverzneva 192 224
Study of the Conformations and Catalytic Activity of Lactate Dehydrogenase — I. A. Bolotina, D. S. Markovich, M. V. Vol'kenshtein, and P. Zavodskii 199 231
Isolation of the Aminoacyl-sRNA Synthetase Fraction from Chloroplasts, Its Purification and Properties — K. A. Aliev, I. I. Filippovich, and N. M. Sisakyan 206 240
Isolation of the Denatured Regions of DNA Through Modification by a Water-Soluble Carbodiimide and Subsequent Enzymatic Hydrolysis — V. F. Drevich, D. G. Knorre, É. G. Malygin, and R. I. Salganik 214 249
Physicochemical Study of Formation and Induction of Prophage — L. E. Drabkina, M. I. Mosevitskii, and I. M. Stepanova 220 257
Use of Glass Electrodes to Study the Distribution of K^+ and Na^+ Ions between Different Types of Mitochondria and the Medium — N. K. Monakhov, A. A. Lev, and É. P. Buzhinskii 226 264
Isolation and Physicochemical Properties of DNA from T1 Bacteriophage — S. E. Bresler, N. A. Kiselev, V. F. Manyakov, M. I. Mosevitskii, and A. L. Timkovskii 232 271
Changes in the Rate of Synthesis of Antibodies and of Nonspecific γ-Globulins in Rabbit Spleen Following Primary and Secondary Immunizations — A.E. Gurvich and G.I. Drizlikh 240 279
A Reversible Photochemical Reaction of O-Hydroxyaldehydes and Some of Their Analogs — V. I. Ivanov, M. Ya. Karpeiskii, A. S. Klimenko, N. P. Bazhulina, Yu. V. Morozov, and N. Sh. Padyukova 248 288
Differential Spectrophotometric Study of Melting of DNA in Presence of Formaldehyde — V. V. Simonov, N. I. Ryabchenko, and A. M. Poverennyi 256 297
Quaternary Structure of Glyceraldehyde Phosphate Dehydrogenase According to the Data of X-Ray Studies — A. I. Goryunov and N. S. Andreeva 261 302
Oligonucleotide Synthesis Catalyzed by Guanyl-Ribonuclease of Actinomycetes — N. M. Abrosimova-Amel'yanchik, R. I. Tatarskaya, and A. A. Baev 266 307
A Contribution to the Theory of Helix-Coil Transition in DNA — A. A. Vedenov, A. M. Dykhe, A. D. Frank-Kamenetskii, and M. D. Frank-Kamenetskii 272 313

Volume 1, Number 3 May-June, 1967

Circular Dichroism of Transfer RNA Oligonucleotides — G. B. Zavil'gel'skii and L. Li	279	323
Specific Cleavage at Cytidine Residues of tRNA Modified by Water-Soluble Carbodiimide — O. I. Ivanova, D. G. Knorre, and E. G. Malygin	288	335
Excited States of the Watson-Crick Base Pairs of DNA — V. A. Kuprievich, V. I. Danilov, and O. V. Shramko	294	343
Investigation of the Stabilizing and Destabilizing Effects of Ribonuclease on the DNA Double Helix — Yu. N. Kosaganov, Yu. S. Lazurkin, and N. V. Sidorenko	301	352
Study of the Aggregated Forms of Chlorophyll and Its Analogs in Connection with the Structural Peculiarities of the Pigment Molecules — M. I. Bistrova and A. A. Krasnovskii	310	362
Kinetic Investigation of the Enzymatic Oxidation of Xanthine in the Presence of Polyphenols — É. M. Gonikberg, L. S. Vartanyan, V. N. Dorovska, and N. M. Émanuél'	319	373
Formation of an Enzyme-Substrate Complex between Lysozyme and Chitin as a Function of Medium Conditions — I. A. Cherkasov and N. A. Kravchenko	326	381
Separation of Complementary DNA Strands — S. E. Bresler, R. A. Kreneva, V. V. Kushev, M. I. Mosevitskii, and N. S. Tikhomirova-Sidorova	334	391
Comparative Study of the Quenching of Fluorescence of Chlorophyll and Its Analogues in Solutions and in Chloroplasts — N. N. Drozdova and A. A. Krasnovskii	337	395
Model Investigation of Trigger Schemes and the Differentiation Process — L. N. Grigorov, M. S. Polyakova, and D. S. Chernavskii	349	410
Elastic Deformations of Protein-Enzyme — D. S. Chernavskii, Yu. I. Khurgin, and S. E. Shnol'	357	419
Reaction of Borates with the Imidazole Group of Histidine Residue in the Active Site of α-Chymotrypsin — I. V. Berezin, G. Ya. Kolomiitseva, A. V. Levashov, and K. Martinek	362	425
Derepression of Nucleic Acid Synthesis Following the Breakdown of Bacteria — I. A. Bass, Yu. N. Zograf, and R. B. Khesin	370	436

Volume 1, Number 4 July-August, 1967

Proton Relaxation in Some Protein Solutions and Gels—L. A. Abetsedarskaya, F. G. Miftakhutdinova, V. D. Fedotov, and N. A. Mal'tsev	381	451
Isolation of Transfer RNA from Aqueous Phase after Phenol Extraction by Sorption on a Column with Aminoethyl Cellulose—L. S. Sandakhchiev, V. K. Starostina, L. E. Stefanovich, and V. M. Chuchaev	391	463
Investigation of Hemoglobin and Myoglobin by Magnetooptical Rotation—M. V. Vol'kenshtein, Yu. A. Sharonov, and A. K. Shemelin	395	467
A Study of the Heme-Ligand Interaction in Myoglobin Derivatives by Magnetooptical Rotation—B. A. Atanosov, M. V. Vol'kenshtein, Yu. A. Sharonov, and A. K. Shemelin	404	477
Proteins (Antibodies) That React Specifically with DNA Damaged by Exposure to Ultraviolet Radiation—V. K. Podgorodnichenko and A. M. Poverennyi	409	483
Study of the Binding Properties of Carbamyl-α-Chymotrypsin by the Kinetic Method—I. V. Berezin, G. Ya. Kolomiitseva, and K. Martinek	413	488
Action of Lysozyme on the Tetrasaccharide from Chitin—N. A. Kravchenko and Yu. D. Kuznetsov	421	498
Physicochemical Properties of DNA Fractions—V. I. Tokarskaya and S. R. Umanskii	433	511
Heat Denaturation of Trypsin in the Presence of Urea—V. P. Kushner and V. M. Bozhkov	439	518
Fractionation of Isoacceptor Transport Ribonucleic Acids on Protein-Cellulose Columns —V. A. Artamonova, L. Yu. Frolova, and L. L. Kiselev	449	530

Electronic Aspects of the Mechanisms of the Lethal and Mutagenic Effects of Ultraviolet Light–G. G. Dyadyusha, V. I. Danilov, and O. V. Shramko 456 539
Alpha- and Beta- Structures in Copolymers of ε-Carbobenzoxy-L-Lysine and S-Carbobenzoxymethyl-L-Cysteine–N. G. Illarionova, I. A. Bolotina, B. Z. Volchek, A. T. Gudkov, Yu. V. Mitin, and O. B. Ptitsyn 460 544
Study of the Hormonal Induction of Tyrosine-α-Ketoglutarate Transaminase in Cells of the Regenerating Rat Liver as a Function of Their DNA Content–S. V. Argutinskaya, N. P. Mertvetsov, and R. I. Salganik 467 553
Modification of Uridylic Acid in Alkaline Solutions of Hydroxamic Acids–N. K. Kochetkov, E. I. Budovskii, and V. D. Domkin 471 558
Nuclear Ribonucleoproteins Containing Messenger RNA. II. Interaction with Free mRNA and Ribosomes–O. P. Samarina, A. A. Krichevskaya, and G. P. Georgiev 478 565
An Investigation of the Random Coil-Globule Transition in Macromolecules by the Monte Carlo Method–A. K. Kron, O. B. Ptitsyn, A. M. Skvortsov, and A. K. Fedorov. . 487 576
Effect of Secondary Structure of Polynucleotides on Rate of Hydroxylaminolysis–N. K. Kochetkov, É. I. Budovskii, and V. P. Demushkin 492 583
Optical Activity of the Enzyme-Substrate Complex of Glutamate-Aspartate Transaminase –V. I. Ivanov, Yu. N. Breusov, M. Ya. Karpeiskii, and O. L. Polyanovskii 496 588
Structure of Pepsin: Projection of Electron Density with Resolution of 5·5 Å–V. V. Borisov, V. R. Melik-Adamyan, L. E. Sotnikova, N. E. Shchutskever, and N. S. Andreeva 503 596
Effect of Pyridoxal Phosphate on the Configuration of Aspartate Apotransaminase from Pig Heart–Yu. M. Torchinskii, L. V. Abaturov, Ya. M. Varshavskii, and R. S. Nezlin. 508 603

Volume 1, Number 5 September-October, 1967

Advances in a Young Science 513 611
Specific Hydrolysis of A and B Chains of Oxidized Insulin by Ion-Exchange Resins. II. Structure of Carboxylic Resins and Their Hydrolytic Function–M. V. Glikina, L. R. Gudkin, S. V. Makhortykh, G. V. Samsonov, R. N. Mishaeva, V. A. Dinaburg, and K. M. Genender. 516 615
Catalyzer Effects on Rate of Hydroxylamine Reaction with Nucleic Acids in Conditions Favoring Modification of Uracil Nuclei–M. F. Turchinskii, E. D. Sverdlov, and É. I. Budovskii 522 623
The Photosynthetic Unit: a "Physical" or "Statistical" Model?–L. A. Tumerman and E. M. Sorokin. 527 628
Red Pigment of an Adenine-Deficient Mutant of the Yeast Saccharomyces cerevisiae –M. N. Smirnov, V. N. Smirnov, É. I. Budovskii, S. G. Inge-Vechtomov, and N. G. Serebryakov. 536 639
Nuclear Ribonucleoproteins Containing Messenger RNA. III. Dissociation of Particles to RNA and Protein and Their Subsequent Reconstruction–O. P. Samarina, Janos Molnar, A. A. Krichevskaya, E. M. Lukanidin, V. I. Bruskov, and G. P. Georgiev 544 648
Formation of Collagen-Type Triple-Chain Helices in Polypeptides with Certain Amino Acid Sequences–N. S. Andreeva, N. G. Esipova, M. I. Millionova, V. N. Rogulenkova, and V. A. Shibnev 553 657
Investigation of Helix-Coil Transition in Poly-L-Glutamic Acid by the Method of Diffuse Small-Angle Scattering of X-rays–A. I. Grigor'ev, N. A. Andreeva, L. A. Volkova, and O. B. Ptitsyn. 559 665
Stability of Peptidyl-tRNA–S. E. Bresler, R. A. Graevskaya, S. V. Kirillov, and E. M. Saminskii 564 672
Nature of Complexes of Cu^{+} and Ag^{+} with DNA–V. I. Ivanov, L. E. Minchenkova, and V. P. Timofeev. 572 682

Separation of Metabolically Stable and Labile Messenger RNA from Animal Cell Nuclei —V. Ya. Arion, V. L. Mant'eva, and G. P. Georgiev 577 689
Chemiluminescence of Chlorophyll and Other Pigments upon Photooxidation —A. A. Krasnovskii and F. F. Litvin 586 699
Loss of the Common Component of the Carbohydrate Transport System in the Mutant Escherichia coli K-12—G. I. Burd, V. P. Shabolenko, and V. N. Gershanovich 597 713
Reversibile Inactivation of α-Chymotrypsin Resulting from Interaction of Cu^{++} Ions with the Imidazole Group of a Histidine Residue—I. V. Berezin, Kh. Vill', K. Martinek, and A. K. Yatsimirskii 602 719
Investigation into the Nature of the Bonding of Coenzyme with Apoenzyme and with Substrate in Cysteine Lyase—É. A. Tolosa, E. V. Goryachenkova, L. N. Stesina, and A. E. Braunshtein 610 729
Changes in the Properties of RNA-Polymerase upon Binding to DNA and the Initiation of RNA Synthesis—R. B. Khesin, O. B. Astaurova, M. F. Shemyakin, S. G. Kamzolova, and V. F. Manyakov. 617 736
Primary Structure of Valine Transfer RNA 1 of Baker's Yeast—A. A. Baev, T. V. Venkstern, A. D. Mirzabekov, A. I. Krutilina, L. Li, and V. D. Aksel'rod. . . . 631 754
The Interaction of Imidazole of N-Protected Amino Acids with Transfer Ribonucleic Acids —B. P. Gottikh, A. A. Kraevskii, L. L. Kiselev, and L. Yu. Frolova 641 767

CONFERENCES
Jubilee Scientific Session of Problems in Molecular Biology, Dedicated to the Fiftieth Anniversary of the Great October Socialist Revolution 645 772

Volume 1, Number 6 November-December, 1967

Chemical Model Study of Protein Structure—Yu. V. Mitin. 649 779
Method of Producing Deuridylic RNA Containing Ribosyl Residues with Free Glycosidic Hydroxyl—M. F. Turchinskii, L. I. Gus'kova, and É. I. Budovskii 659 792
Absence of Differences in Priming Activity between Rat Hepatoma DNA and Normal Rat Liver DNA—N. P. Loshkareva. 661 795
Relationships between Limiting Viscosity Number and Molecular Weight for Poly-S-Carbobenzoxymethyl-L-Cysteine in Compact and Randomly Coiled States —N. G. Illarionova, Yu. V. Mitin, and O. B. Ptitsyn 667 802
The Heterogeneity of the Subunits of the 11S Protein of Soybean Seeds—I. A. Vaintraub. . . . 671 807
Preparation and Properties of Chromosomal Desoxynucleoprotein Complexes —G. P. Georgiev, Yu. V. Il'in, A. S. Tikhonenko, N. N. Dobbert, and L. N. Anan'eva 677 815
Effect of Potassium Chloroplatinite on the Physico-Chemical Properties of DNA —E. T. Zakharenko, L. F. Malysheva, and Yu. Sh. Moshkovskii 691 830
Effect of Acetylation of the Ribose 2'-Hydroxyl Groups of Polyribonucleotides on Their Template Activity—D. G. Knorre, V. I. Sirotyuk, and L. E. Stefanovich 697 837
Inhibitory Effect of Cu^{++} Cations on the Hydrolysis of the Ethyl Ester of N-Acetyl-L-Tyrosine by α-Chymotrypsin—I. V. Berezin, Kh. Vill', K. Martinek, A. K. Yatsimirskii, and M. S. Khludova. 702 843
Denaturation of Oxyhemoglobin Studied by the Method of Natural and Magnetic Rotation of the Plane of Polarized Light—M. V. Vol'kenshtein, L. I. Govshovichus, Yu. A. Sharonov, and A. K. Shemelin 710 854
Functional Properties of Fragments of Valine Transfer RNA—A. A. Baev, I. Fodor, A. D. Mirzabekov, V. D. Aksel'rod, and L. Ya. Kazarinova 714 859
